

TAXTOKEN

BLOCKCHAIN ACCOUNTING SOLUTIONS

TaxToken is a software company that leverages blockchain technology to enhance current accounting methods. TaxToken's patent-pending technology is capable of saving clients an immense amount of money and time. While TaxToken plans to revolutionize many facets of accounting, we are currently focused on three distinct areas.

PERSONAL ACCOUNTING

Our tax preparation application enables effortless personal accounting by:

- Integrating smart cards, the blockchain, and AI
- Auto-filling tax forms
- Eliminating the need for paper receipts through record keeping on the blockchain, generated with the swipe of a credit card
- Automatically itemizing your deductions
- Saving Americans hundreds of dollars and hours of tax preparation each year

TAXES THAT FILE THEMSELVES

INVOICING & BUSINESS SOLUTIONS

TaxToken's software for businesses can help maximize your accounting system's efficiency by:

- Slashing merchant payment fees from ~3% to 1%
- Auto-confirming payments
- Providing third-party verification of data, reducing audit costs and increasing fraud protection
- Auto-generating journal entries
- Eliminating charge back fees
- Automatically filing business expenses with the swipe of a credit card
- Offers option of actual expense versus standard mileage rates

ENHANCED DATA FOR SMART DECISION MAKING

CAPITAL GAINS & LOSSES CALCULATOR

Our patent-pending gains and losses calculator provides the solution to an emerging need for millions of Americans by:

- Tracking and sorting cryptocurrency capital gains and losses
- Auto-filling tax forms
- Helping taxpayers stay compliant with IRS regulations in an uncertain and evolving cryptocurrency market
- Providing secure, decentralized storage of financial records with the blockchain

EASE OF MIND WITH ENSURED TAX COMPLIANCE

SMART CARD INTEGRATION FOR PERSONAL ACCOUNTING

Users download the app and sync their smart cards

Users continue their everyday spending habits as usual

Every transaction made with the smart card is recorded on the blockchain

1001
0010
1010

Our AI software sorts the transactions into an itemized list of tax deductions and business expenses

Come tax season, users return to the app to receive their list of recommended tax deductions and business expenses

TaxToken autofills users' 1040 forms for them to review, adjust if desired, and then submit

TaxToken electronically files users' taxes with the IRS
